Announcement 1

Minimum Fertilizer Standard for Plantation Farms

Pursuant to the provisions of paragraph 8 of section 2 of part I of Insular Region Bulletin 101 - Hawaii and paragraph 8 of section 3 of part I of Insular Region Bulletin 101 - Puerto Rico, the following minimum standard is approved for the application of chemical fertilizer on plantation farms:

In order for a plantation farm to qualify for the payment set forth in paragraph 8 of section 2 of part I of Insular Region Bulletin 101 - Hawaii and in paragraph 8 of section 3 of part I of Insular Region Bulletin 101 - Puerto Rico, the amount of chemical fertilizer applied on such farm during the calendar year 1937 shall be:

(1) On all or part of the land on which sugarcane is grown at any time during the calendar year 1937, an amount of such fertilizer which contains an average quantity of plant food per acre on which such fertilizer is applied, equal to not less than the greater of either:

(a) 150 pounds; or

(b) 90% of the quantity of plant food contained in the average amount of chemical fertilizer which was applied during the calendar year 1936 per acre of that part of the land on which sugarcane was grown at any time during such year on which such fertilizer was applied.

(2) On all or part of the land on which pineapples are grown at any time during the calendar year 1937, an amount of such fertilizer which contains an average quantity of plant food per acre on which such fertilizer is applied, equal to not less than the greater of either:

(a) 150 pounds; or

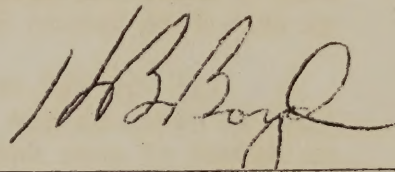

(b) 80% of the quantity of plant food contained in the average amount of chemical fertilizer which was applied during the calendar year 1936 per acre of that part of the land on which pineapples were grown at any time during such year on which such fertilizer was applied.

(3) On land on which neither sugarcane nor pineapples is grown at any time during the calendar year 1937, an amount of such fertilizer which contains not less than an average of 100 pounds of plant food per acre of that part of such land with respect to which payment is applied for based on the application of such fertilizer.

"Chemical fertilizer" as used herein means commercial chemical fertilizer not less than 15 percent of the gross weight of which consists of plant food.

"Plant food" as used herein means the aggregate amount of nitrogen, available phosphoric acid and water soluble potash, determined in accordance with the applicable methods of analysis set forth in "Official and Tentative Methods of Analysis of Association of Official Agricultural Chemists", Fourth Edition, 1935.
